

# We can lift your job

 **PRONOMIC**

# Ergonomic technology which is good for body and soul

When PRONOMIC was founded in 1989 the setup was not only technically focussed on the increase of productivity. Right from the start focus was set on workers health and safety. Considering a healthy worker being more motivated and innovative for the company. Health has to be valued and protected as highest good.

## Material handling in the right way

PRONOMIC has extensive experience in material handling, and we know that conditions vary from customer to customer. Our Products Lift&Drive and Mobi Crane is designed to handle the most frequent manual lifting. Let Pronomics products lift your job ergonomic and at the same time prevent strain injuries. All PRONOMIC products and solutions are designed, made and tested in such a way, that every unit fulfils CE and EMC- standards and follow the guidelines to provide safest possible operation on international level.

## Products that are Swedish made

All Pronomics product development, design and production is done at our facility in Sollentuna, often in close collaboration with our customers and suppliers. This brings us to ensure that products meet the high quality that we seek.

Ergonomic and quality made in Sweden – for international use.

## Dedicated experts

An important part of our success is our experienced staff - sales consultants who are working to find solutions that meet customer requirements. Together with our wide range of standard products and extensive experience in customization, we find a solution to all problems.

# Our lift trolleys, Lift&Drive

## – when you should manage different types of materials

Lift&Drive is the perfect solution when you should manage different types of materials in various environments. The management may consist of transporting materials from one job or lifting, twisting and spinning materials. Our coaches

will also be available to easily weigh the material, by choosing our platform with the integrated scale. Our long experience of customized solutions means we can always deliver a solution that is just right for your situation.

### Our lift trolleys Lift&Drive is available in three series:

**P – Professional** come with individual customizations and are based on endless modular opportunities.

**IE – Industrial Eco** practical and adapted for use in industrial applications.

**E – ECO** come as standardized preset base models and offer loads of options to choose from.

All series available in painted or stainless steel.

P-Series is our modular trolleys that are easy to customize and rebuild. They can handle weights up to 225 kg.

IE series is available with a lifting capacity of 90 and 115 kg. Stable welded chassis that is wider and longer than the E-model for larger weights and sizes of goods.

E-Series is available with lifting capacity of 70 and 90 kg. Based on these trolleys, we have made some industry-specific lift trolleys for example pharmacy, catering and archives.

## A unique modular concept

Endless flexibility in all perspectives. Thanks to our unique modular design, we provide Lift&Drive in many execution and deliver the lift trolley that is perfect for your application. We adapt the lift trolleys height, width and type of wheels according to how you will use it.

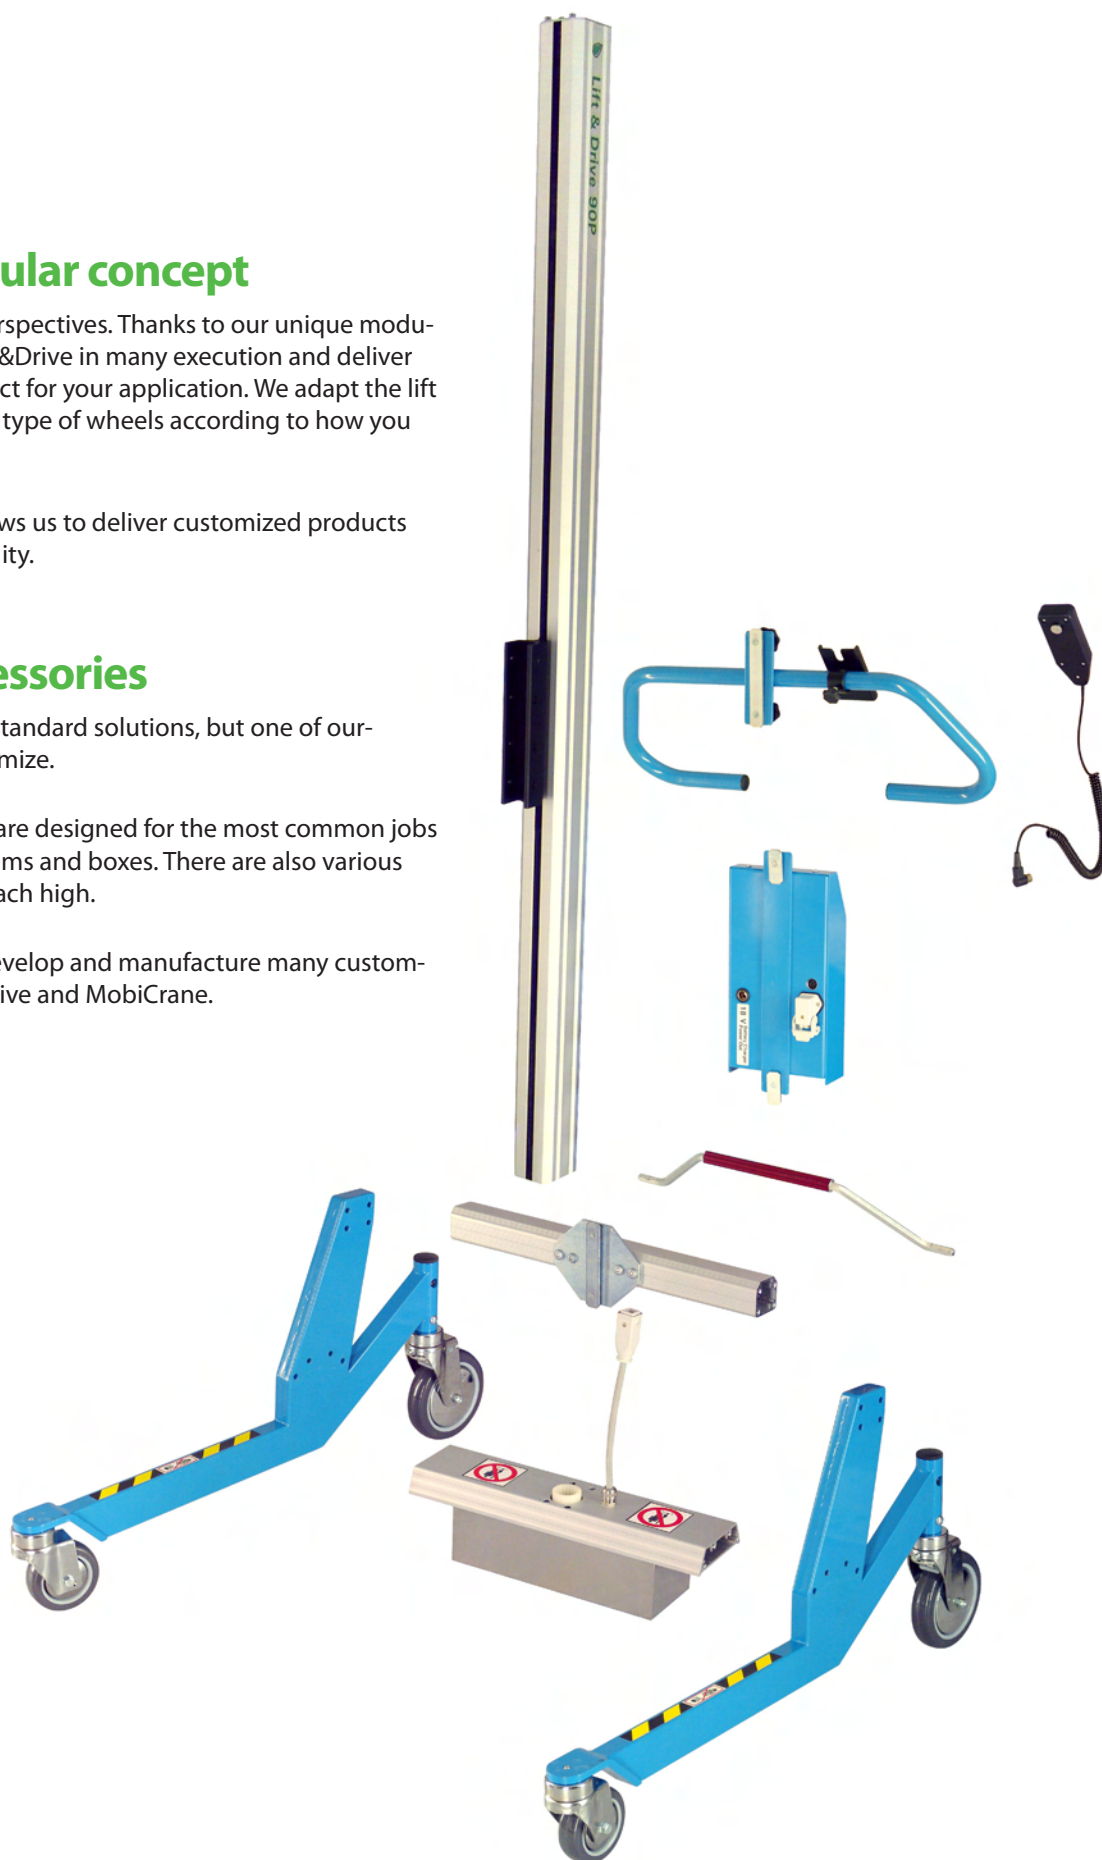

The modular concept allows us to deliver customized products and solutions of high quality.

## Tools and Accessories

We have a wide range of standard solutions, but one of our strengths is that we customize.

The standard accessories are designed for the most common jobs such as handling rolls, drums and boxes. There are also various means, such ladders to reach high.

In addition to these we develop and manufacture many customized tools for both Lift&Drive and MobiCrane.

Lift trolley with roll platform

Lift trolley for archives

Lift trolley for roll handling

Lift trolley for tyre

Extra wide lift trolley

Lift trolley teleskopmast

Pharmacy trolley

Lift trolley with Expand&Turn

Lift trolley with Squeeze&Turn

Lift trolley with Squeeze&Turn (stainless)

# MobiCrane

## – the crane with many opportunities

MobiCrane is a mobile and flexible crane with infinite possibilities. Designed for handling sheet material, sacks, boxes and bespoke products up to 85 kg. The lift generated by a built-in motor. Since MobiCrane is built of different modules, it is easy to put together a tap as needed. MobiCrane mounted on a floor plate is very easy to move around in the workshop, with

a standard hand pallet truck. MobiCrane can be installed in different ways, directly on the floor, in the wall or on an existing machine. If you wish a mobile crane mounted on one of our self-supporting bottenlattform, choose battery or AC power, no installation required.

We produce everything ourselves, and can customize a tap on your requirements.

As a manufacturer of high quality lighting solutions as manufactured in a process that requires a lot of manual handling, it is a matter of course to focus on lifting equipment that are ergonomically designed and flexible to use. We have in several places in the production chosen MobiCrane from PRONOMIC of these reasons. And that the equipment's is built in modules, which provide an opportunity for flexibility even in layout and workplace design. Pronomic is also rapid to provide quotes for special solutions"

– Göran Tinglöv, M Sc, Manager Manufacturing Engineering and Quality, Glamox Luxo Lighting AB

## PRONOMIC knowledge in handling solutions.

At PRONOMIC customers benefit from more than 20 years of experience in ergonomic and efficient materials handling. Our products are designed for easy use and provide individual customizing possibilities for all needs. PRONONMIC products are used and represented worldwide.

## MobiArm

### – adjustable and mobile

MobiArm, our adjustable and mobile viksvängkran. It is an excellent complement to conventional column mounted cranes, to mount the lifting equipment, such as our vacuum tube lifters Easyhand or Vacu-Hand, or a hoist. Maximum load is 100 kg with a 2 meter arm. You can arm lengths 2-4 feet.

MobiArm with a fixed or adjustable column mounted on one of our floor tiles can be easily moved around in production by means of a manual pallet truck.

MobiArm can be delivered without pillars and floor pan. Then, by means of a bracket mounted directly on a wall or a machine.
